

Enviroshake[®]

Quality Engineered Roofing

The authentic look of cedar and slate with lifetime performance

Why Enviroshake?

Enviroshake composite roofing products are designed to replicate the natural appearance of cedar and slate with the longevity and durability natural products simply can't duplicate. While backed by a lifetime warranty, Enviroshake has been tested for all markets to meet the highest ratings in the roofing industry. Rest assured for many years to come with minimal maintenance and a roof that will protect and enhance the curb appeal of your home. When choosing your next roof, Enviroshake is the perfect choice.

Aged Cedar Enviroshake®

“We love our roof...
Enviroshake definitely does have the look of cedar shakes.”
– Bill & Betsy Buchanan

  Rated 'Excellent' on [trustpilot.com](https://www.trustpilot.com)

Unmatched in every category

and backed by third-party testing

Try our roof visualizer

Our Roof Visualizer is the perfect way to quickly see how an Enviroshake roof will look on your home.

Try it at www.enviroshake.chameleonpower.com

Enviroshake's products are designed to weather and replicate the timeless appearance of natural cedar or slate. While environmentally friendly, Enviroshake is also walkable, resistant to fire, hail and wind, and has been crafted to be one of the most durable alternatives to cedar and slate on the market.

We have made every effort to display as accurately as possible the colours of the products we carry, but cannot guarantee that what you see is an exact representation. We recommend asking your sales representative for current production samples to confirm your colour selection. Multi-tone color combinations are custom. Additional custom colors are available upon request.

ENVIROSLATE®

Charcoal Grey Enviroslate®

“We live across the street from a prestigious builder in our area... When we were having our Enviroshake roof installed, he liked what he saw and a few months later an Enviroshake roof is now on one of his homes!” – Carol Kranz

Same natural look, less maintenance

Enviroslate embraces natural slate's genuine beauty without the cost, weight, and upkeep. Our slate tiles are designed using 3D images of natural slate and like genuine slate, they feature subtle variations in tone and thickness to create an authentic looking roof. Engineered to outperform nature with the durability and weather resistance only an engineered product can offer.

Enviroshake delivers sustainability

Enviroshake takes pride in limiting its environmental footprint at every step. Manufactured from 95% reprocessed post-industrial polymers, elastomers, and fibers, Enviroshake is a fully sustainable product. Scrap material generated in manufacturing is recycled into the system and non-biodegradable waste materials are diverted. The USGBC has assessed Enviroshake as contributing 16.5 direct points, and 57 relevant LEED points. As an added benefit, Enviroshake products are fully recyclable.

Multi-Tone Enviroshake®

“Neighbour always comments on how nice the roof looks. Enviroshake is easy and always there when I have a question about the product. A+” – *Peakmasters Inc.*
